

Proper care and upkeep for Type 4 Clothing

True to your exact, precise nature, knowing how to properly care for your clothing will help your clothes maintain long-standing saturated colors, maintain quality, and keep your garments looking new.

- Always wash clothes wrong side out.
- Use Woollite® Dark for all blacks and navy.
- Wash all darks and colors in cold water.
- Use an enzyme cleaner such as BIZ to keep whites white.
- Hand wash when appropriate.
- Spot wash when possible (colors slowly fade with each washing).
- Wash vibrant colored garments alone as to not bleed on other garments.
